Fondation Ensemble
Annual Report
2014
2014, a remarkable year…

- **Implementation of our refocusing strategy:** five core countries and four focus sectors redefined, with projects that are always cross-cutting (entrepreneurship, strengthening the role of women in civil society, etc.). *Everything is interconnected*, as the name of our foundation symbolizes.

- **New website, www.fondationensemble.org:** effective, lively, clear, comprehensive… and visually appealing. One of the immediate results: a reduction in quantity but improvement in quality of the project proposals received.

- **Spotlight on our tenth anniversary celebrations:** Grand Prize for the 10th anniversary of the Foundation awarded to Rainforest Alliance, Special Jury Prize to La Voûte nubienne. And our results: 220 projects supported with €20 million of our own funds, 82 operational partnerships, 5.2 million beneficiaries, 2.2 million hectares of land and 36 animal species protected, 2 million trees replanted.

- **The lifeblood behind the figures:** 33 volunteer experts, a dedicated team, an actively participating board of directors.

- **Awards:** International Philanthropy 'Oscar' from the Admical network, and the Foundation named by Youphil as one of the ten most important French philanthropists.

- Ten years ago, few of us were supporting initiatives that link human development with protection of the planet and all its living creatures. Nowadays, it’s a subject on everyone’s lips … And we have established financial partnerships, the most important of which, with Oak Foundation, is supporting a strategic initiative on sustainable artisanal fishing in Mozambique, where fish is a vital food and economic resource.

«Ensemble», we will always go further…
